

Ultrasonic Flow Instrumentation

Instruments developed and manufactured by MIB GmbH
MIB GmbH was founded by two former Endress & Hauser employees
Growing company, serving local SME's and world class OEM's
ASML, Thermofisher
AB Inbev
MERCK (MSD), Janssen Biologics (Johnson & Johnson)

We deliver Trust

Flowmeters 'made in Germany, Quality by Design'

- Patented signal processing
- Own design hardware
- Own software
- Large installed base worldwide

Installed base time-line

- gastronomy, 17.000+ type Flowmax 30S
- chemicals, 2000+ type Flowmax 400i
- industry, 9000+ type Flowmax 44i, 42i and 54i
- bio-pharmacy, Single Use Flowmax 242i since 2015

What's our offer?

We are small enough to listen to your needs
Only proven solutions
We care for one-off or large series

Single Use is just another version

NO concessions to Function, Reliability or Quality

We deliver Trust

Why FlowMax?

- | | | |
|-----------------|-----|---|
| Hygienic design | ___ | No gaps or seals, lowest surface roughness |
| Open bore | ___ | Low resistance, CIP-capable |
| No moving parts | ___ | Drift free, stable and no risk for particles |
| Fast | ___ | Handles pulsating flow excellently |
| Accurate | ___ | Proven with calibration certificate |
| Flow and more | ___ | flowrate, temperature, bubble-detection,
actual speed of sound Liquid-ID
flow-control (using back-pressure control-valve) |

Features of Flowmax 242i Single Use flowmeter

Approved PP material

Industrial quality and reliability

Each measuring tube is calibrated

Flexibility to use different DN-sizes for different batches

Supplied as component or as tailor-made set

Only dispose the measuring tube,

electronics are permanent

Affordable, small footprint

Ultrasonic Flow Instrumentation
